## profile

A **smart developer** and a **hard worker**. I can work and communicate well in a team. I have a great **sense of responsibility**. I enjoy tackling different tasks. I like to take **initiative** and enjoy constructive feedback. I appreciate **honesty** and advice and always look ahead.

## Work experience

### Software developer, Inktweb.nl, Alkmaar

FEBRUARI 2022 — TO THE PRESENT

The Inktweb.nl webshop was built from scratch without using ready-made templates. The project started using pure PHP, MySQL, simple JavaScript and jQuery. Later, Laravel and Vue were integrated into the project.

The webshop consists of two important parts: the user interface and an extensive administrator panel with complex relationships and logic.

striving to fulfill the wishes of both webshop users (via the user interface) and our colleagues (via the administrator panel). This means that I work on simplifying the process, finding and fixing bugs, implementing new features, writing SQL queries, normalizing the database, integrating more object oriented programming (OOP) into the project and improving the user interface and experience.

In addition, I am responsible for refactoring old code, integrating Laravel and Vue into our project and updating our admin panel.

### Sales employee, BP, Hoorn

NOVEMBER 2021 — APRIL 2022

Working as a sales employee at BP Kruisoord-A7 during the weekend.

### Production worker, By: Leegwater, Paramelt, Vezet, Jos Slippens vleeswaren, Heerhugowaard

2018 — 2021

Working hard and studying at the same time. That's why I had a lot of side jobs and summer jobs as a production employee. I have also worked as a cleaner at Aviateur and as a delivery man at Ali baba.

### Company director, private company

2013 — 2015

Experience in Syria. Ever since I was a boy I wanted to have a job that earns me money. I worked in a private company in Damascus. fulfilled several functions: - Company director - Seller - Cashier

## Training

### Software developer, Horizon College, Alkmaar

AUGUSTUS 2020 — APRIL 2022

Level MBO 4, takes four years. However, toppers were allowed to follow an accelerating trajectory. Of course I was a winner and I followed the three-year trajectory.

English

Germany

Dutch

## Hobby's

Team sports & learning foreign languages.

## Internships

### Software developer, Inktweb.nl, Alkmaar

AUGUSTUS 2021 — JANUARI 2022

My internship at Inktweb.nl was completed very successfully, so I learned a lot and proudly completed many tasks. I also had the opportunity to apply several ideas to their website.

### Software developer, Inktweb.nl, Alkmaar

AUGUSTUS 2022 — JANUARI 2023

At that time I was already employed by the company and over time I continued to grow, which gave me the opportunity to mentor another intern. I also delved more into Laravel and started to master Vue.
